michadasis.com ↗
github.com/michadasis ↗
in/johnmichadasis ↗

Full stack developer building web and mobile apps, and the APIs, databases, data pipelines and automation behind them, with React, Next.js, Node.js, FastAPI and PostgreSQL. I build software for my university's community and my city, from a Discord verification bot that has verified 106 students to an upcoming city bus app for Kastoria.

EDUCATION

BSc Computer Science, University of Western Macedonia

2025 – 2029 (expected)

High School Diploma, 1st High School of Agios Athanasios, 2022 – 2025, 17.6/20

Languages: Greek (native), English (C2, Michigan ECPE)

EXPERIENCE

Lead Software Engineer (Volunteer), Open Source UoM

May 2026 – Present

UniOS, a Linux distribution for Greek university students, and its apps · open-source-uom on GitHub ↗

- UniBackpack ↗ (Qt6/C++): real apt and pacman install progress instead of a timer; data in JSON.
- UniDesk ↗ (PyQt6): rebuilt the UI and structure of the distro's welcome app and wrote its docs.
- Debian packaging and signed GitHub Actions releases to the Launchpad PPA for the UniOS tools.
- Redesigned the UniOS landing page ↗, fixed the Arch ISO build and made a Qt6 workshop demo app.

Founder, Kastoria Dev Core

Oct 2026 – Present

Student team building open source projects for Kastoria · Kastoria-Dev-Core on GitHub ↗

- Started and lead the team; our first project, the city bus app, is approved by KTEL Kastorias.
- Daily GitHub Actions sync of the operator's timetables and a Node.js announcements feed on Vercel.

Server Admin & Developer, Πληροφορική UoWM Discord

2026 – Present

- Help run the CS students' Discord server (181 members) and build its tools, including the verification bot.
- Built a watcher that posts new exam schedules and timetables from cs.uowm.gr within minutes of upload.

Freelance Web Developer, Nintri Tavern

Jul 2026

Paid client project · nintritavern.com ↗

- Built a Greek/English site for a family tavern in Zakynthos: menu, gallery and contact sections.
- Handled image optimisation, SEO, Google Search Console and deployment on the client's hosting.

Student Member, IEEE Student Branch Kastoria

Dec 2025 – May 2026

- Worked with a student team on my.cs.uowm.gr ↗, the CS department's student portal.
- Added the weekly restaurant menu to the portal by reusing the PDF parser from my menu pipeline.

PROJECTS

Kastoria City Buses

Oct 2026 – Present

Kotlin, Jetpack Compose, Node.js, GitHub Actions · Source ↗ · in development, approved by the operator

- Native Android app with next departures for 209 stops and 18 lines, on each day's timetable.
- Live bus positions from the drivers' phones, with timetable estimates as a fallback; works offline.

UoWM Auth Discord Bot

Sep 2026 – Present

Node.js, discord.js, MariaDB, Nodemailer · Source ↗ · adapted from the MIT-licensed IEE Discord Bot

- Has verified 106 of the server's 181 members with a one-time code sent to their university email.
- Rate limits and a web admin panel with Discord OAuth for settings, role menus and stats, with tests.

UoWM Menu Pipeline & App

Dec 2025 – Sep 2026

Node.js, pdf.js, PostgreSQL, React Native · Pipeline source ↗ · App source ↗ · awaiting university approval

- Daily Node.js job spots new menu PDFs by URL and content hash, then extracts and translates them.
- Rebuilds the menu tables in PostgreSQL behind a React Native app with widgets and offline caching.

StaffOS

Feb 2026 – Aug 2026

Next.js, TypeScript, Prisma, PostgreSQL · Live demo ↗ · Source ↗

- HR platform for employees, tasks, attendance, leave, payroll and messages, with JWT auth and 2FA.
- Migrated the database from MySQL to PostgreSQL with Prisma and deployed it on Vercel.

michadasis.com

Dec 2025 – Present

Next.js, TypeScript, PHP, MariaDB, GitHub Actions · Visit site ↗ · Source ↗

- Project and skill data served by a PHP API on MariaDB behind a static Next.js front end.
- GitHub Actions builds, checks and uploads site and API over FTPS on each push to production.

Blood Alcohol Level Calculator

Nov 2025 – Apr 2026

Python, FastAPI, React · Live demo ↗ · Backend ↗ · Frontend ↗

- Standalone FastAPI service that applies the Widmark formula to weight, sex, drinks and time elapsed.
- Consumed by a React front end, so the calculation can be tested and reused on its own.

SKILLS

Languages	TypeScript, JavaScript, Python, PHP, Kotlin, Java, C, C++, Bash
Backend & data	Node.js, Express.js, FastAPI, PostgreSQL, MariaDB/MySQL, MongoDB, Prisma, JWT
Front end & mobile	React, Next.js, React Native, Expo, Jetpack Compose, TailwindCSS, Qt6
Infra & tools	Linux, Docker, GitHub Actions, Vercel, cron jobs, Debian packaging, Git
